Thassilonian Specialization Transmutation (Arcane, Rune, Sin); **Opposition Schools:** Enchantment, Illusion

Drain Sinful Item  (Arcane, Rune, Sin) Recall a transmutation spell that has already been cast today. Can be used once for each spell level per day but only for transmutation spells. These spells are marked with (◊).

Infinite Possibilities You can use this spell slot to cast any spell from your spellbook that's at least 2 levels lower than the slot you designate; the spell acts in all ways as a spell of 2 levels lower. You don't have any particular spell prepared in that slot until you cast it.

Steady Spellcasting Confident in your technique, you don't easily lose your concentration when you Cast a Spell. If a reaction would disrupt your spellcasting action, attempt a DC 15 flat check. If you succeed, your action isn't disrupted.

Robe of The Archmagi (Uncommon, Evil, Abjuration, Arcane, Invested) This black robe is +2 greater resilient explorer's clothing, and they grant a +1 circumstance bonus to saving throws against arcane spells and resistance 5 to damage from arcane spells.

Items Spellbook, Black Robe of the Archmagi.

AC 39; **Fort** +29 (+1 vs Arcane), **Ref** +32 (+1 vs Arcane), **Will** +32 (+1 vs Arcane)

HP 272 (Includes false life 22HP); **Resistances** 10 physical (stoneskin), Arcane Damage 5 (Robe)

Shield Block  Hardness 25

Counterspell  (Abjuration, Arcane) When a foe Casts a Spell and you can see its manifestations, you can use your own magic to disrupt it. You expend a prepared spell to counter the triggering creature's casting of that same spell. You lose your spell slot as if you had cast the triggering spell. You then attempt to counteract the triggering spell. Counteract check modifier 18 (Int 10, Legendary).

Clever Counterspell Khalib can use Counterspell as long as he has the spell the foe is casting in his spellbook. Khalib has all core rulebook spells, except illusion and enchantment, up to level 9 in his spellbook. When you use Counterspell in this way, the prepared spell you expend must share a trait other than its tradition with the triggering spell. At the GM's discretion, you can instead use a spell that has an opposing trait or that otherwise logically would counter the triggering spell (such as using a cold or water spell to counter fireball or using remove fear to counter a fear spell). Regardless of what spell you expend, you take a -2 penalty to your counteract check, though the GM can waive this penalty if the expended spell is especially appropriate.

Reflect Spell When you successfully use Counterspell to counteract a spell that affects targeted creatures or an area, you can turn that spell's effect back on its caster. When reflected, the spell affects only the original caster, even if it's an area spell or it would normally affect more than one creature. The original caster can attempt a save and use other defenses against the reflected spell as normal.

Shield  (Verbal, Abjuration, Cantrip, Force) Khalib uses his shield cantrip whenever he has actions remaining at the end of his turn. Hardness 25

Foresight (if cast) ➡ ([mis]fortune); **Trigger** Khalib defends against a hostile creature or other danger.

Effect If the hostile creature or danger forces Khalib to roll dice (a saving throw, for example), he rolls twice and uses the higher result, and this spell gains the fortune trait; But if the hostile creature or danger is rolling against Khalib (an attack roll or skill check, for example), that hostile creature or danger rolls twice and uses the lower result, and this spell gains the misfortune trait.

Arcane Save ➡ **Frequency** once per day;

Trigger You attempt a saving throw against an arcane spell, but you haven't rolled yet;

Effect You automatically succeed at your save against the triggering arcane spell.

Speed 35 feet (longstrider), fly 35 feet

Effortless Concentration ♦ You maintain a spell with hardly a thought. You immediately gain the effects of the Sustain a Spell action, allowing you to extend the duration of one of your active class spells.

Quickened Casting ♦ (Concentrate, Metamagic); **Frequency** once per day

If your next action is to cast a cantrip or a spell that is at least 2 levels lower than the highest level spell slot you have, reduce the number of actions to cast it by 1 (minimum 1 action).

Overwhelming Energy ♦ (Manipulate, Metamagic) You alter your spells to overcome resistances.

If the next action you use is to Cast a Spell, the spell ignores an amount of the target's resistance to acid, cold, electricity, fire, or sonic damage equal to your level. This applies to all damage the spell deals, including persistent damage and damage caused by an ongoing effect of the spell, such as the wall created by wall of fire. A creature's immunities are unaffected.

Bespell Weapon ♦ You siphon the residual energy from the last spell you cast into one weapon you're wielding. Until the end of your turn, the weapon deals an extra 1d6 damage of a type depending on the school of the spell you just cast.

Abjuration force damage

Conjuration or Transmutation the same type as the weapon

Divination, Enchantment, or Illusion mental damage

Evocation a type the spell dealt, or force damage if the spell didn't deal damage

Necromancy negative damage
