Shield ♦ (Verbal, Abjuration, Cantrip, Force) Karzoug uses his shield cantrip whenever he has actions remaining at the end of his turn. Hardness 25

Shield Block ↻ Hardness 25

Counterspell ↻ (Abjuration, Arcane) When a foe Casts a Spell and you can see its manifestations, you can expend a prepared spell to counter the triggering creature's casting of that same spell. You lose your spell slot as if you had cast the triggering spell. You then attempt to counteract the triggering spell. Counteract 38 (Int 10, Legendary, Level 20).

Clever Counterspell Karzoug can use Counterspell as long as he has the spell the foe is casting in his spellbook, which contains all core rulebook spells up to level 9, except illusion and enchantment. When you use Counterspell in this way, the prepared spell you expend must share a trait other than its tradition with the triggering spell. At the GM's discretion, you can instead use a spell that has an opposing trait or that otherwise logically would counter the triggering spell (such as using a cold or water spell to counter fireball or using remove fear to counter a fear spell). Regardless of what spell you expend, you take a -2 penalty to your counteract check.

Reflect Spell When you successfully use Counterspell to counteract a spell that affects targeted

creatures or an area, you can turn that spell's effect back on its caster. When reflected, the spell affects only the original caster, even if it's an area spell or it would normally affect more than one creature. The original caster can attempt a save and use other defenses against the reflected spell as normal.

Foresight (if cast) 🌀 (mis/fortune); **Trigger** Karzoug defends against a hostile creature or other danger.

Effect If the hostile creature or danger forces Karzoug to roll dice (a saving throw, for example), he rolls twice and uses the higher result, and this spell gains the fortune trait; But if the hostile creature or danger is rolling against Karzoug (an attack roll or skill check, for example), that hostile creature or danger rolls twice and uses the lower result, and this spell gains the misfortune trait.

Arcane Save 🌀 **Frequency** once per day;

Trigger You attempt a saving throw against an **arcane** spell, but you haven't rolled yet;

Effect You automatically succeed at your save against the triggering **arcane** spell.

Speed 35 feet (longstrider), fly 35 feet

Melee ♦ glaive +31 (Dancing, Flaming, Striking), **Damage** 4d10+22 slashing

Effortless Concentration ♦ You immediately gain the effects of the Sustain a Spell action, allowing you to extend the duration of one of your active class spells.

Quickened Casting ♦ (Concentrate, Metamagic); **Frequency** once per day

Use your next action to cast a cantrip or a spell that is level 7 or lower, reduce the number of actions to cast it by 1 (minimum 1).

Overwhelming Energy ♦ (Manipulate, Metamagic) If the next action you use is to Cast a Spell, the spell ignores 20 resistance to acid, cold, electricity, fire, or sonic damage. This applies to all damage the spell deals, including persistent damage and damage caused by an ongoing effect of the spell, such as the wall created by wall of fire. A creature's immunities are unaffected.

Bespell Weapon ♦ You siphon the residual energy from the last spell you cast into one weapon you're wielding. Until the end of your turn, the weapon deals an extra 1d6 damage of a type depending on the school of the spell you just cast.

Abjuration force damage; **Conjuration or Transmutation** the same type as the weapon;

Divination mental damage; **Evocation** a type the spell dealt, or force damage if the spell didn't deal damage; **Necromancy** negative damage
